Honda city hatchback 2025

From RM 85,900.00 From RM 90,900.00 From RM 95,900.00 From RM 100,900.00 From RM 112,900.00 Contents The Honda City Hatchback is the Japanese brand's newest entry into the segment. Just like the City, it is based on it carries the same engine and transmission options as well as the same chassis. For the Philippine market, the City Hatchback is made available with only one variant which is the RS. Buyers can opt among four colors, namely Meteoroid Gray Metallic, Ignite Red Metallic, Brilliant Sporty Blue, and Platinum White Pearl which would require interested customers to shell out a few extra bucks. Like its sedan counterpart, the Honda City Hatchback is also powered by a 1.5-liter gasoline engine, however, it can only be paired with a Continuously Variable Transmission (CVT). View our pricelist table and select a variant to view further specifications. Page 2 Contents The Mazda2 Hatchback is the brand's subcompact hatchback offering in the Philippines that utilizes the brand's KODO—Soul of Motion design theme. It's the smallest vehicle in Mazda's lineup. Following the sultry design of its bigger brothers, the Mazda2's lines around the body go smoothly with the head and tail lights, giving it a dynamic look. 16-inch diamond cut wheels and skirts around the body give it sportiness, enhancing the overall allure of the Mazda2. Beyond the doors are five seats, and a seven-inch touchscreen LCD monitor (with Apple CarPlay and Android Auto) in the middle for entertainment that can be controlled via buttons on the steering wheel or through the rotary Commander Control near the gear shifter. It also has paddle shifters, an active driving display, and automatic climate control. New in the Mazda2 Hatchback is the G-Vectoring Control (GVC) Plus, which is part of the brand's series of new-generation vehicle dynamics control technology. GVC Plus uses the engine's torque to distribute power among the wheels based on steering input. By optimizing the vehicle load among the wheels, it enhances the car's handling and riding comfort. In short, more fun to drive with less to non-existent body roll. While looks are subjective, the Mazda2 Hatchback's design is done tastefully and something that would appeal to the general population of car buyers. You'll also like the slew of tech features that it offers and its impressive fuel efficiency. On the other hand, it's hard to deny that the Mazda2 Hatchback is a bit pricey for its class. Its interior space is also limited, especially at the back. View our pricelist table and select a variant to view further specifications. Add To Comparison More Variant Info View Price Details The Mazda 2 Hatchback comes in the following colors: Soul Red Crystal, Polymetal Gray, Machine Gray, Jet Black, Snowflake White Pearl, Platinum Quartz, Deep Crystal Blue and Aero Gray Key specifications & features of the Mazda 2 Hatchback. Talking about the looks of the Honda City Hatchback, the car resonates with a styling feature that looks similar to the previous models. The car has adapted its front looks with a precisely neat-looking sedan that is both aggressive and formal at the same time. From the front side of the bike, the car showcases an aggressive-looking complete DRL LED setup. The car also gets a mesh grille design to complement the bold looks of this hatch. Throughout the exterior of the car, users can notice that the City tries to keep up with a minimalist design feature with strong lines running across the body. Further, the rear of the car also witnesses some major rework with its design feature. The City hatchback presents us with a subtle-looking rear spoiler instead of the trunk of the car. Other accessories include a shark-fin antenna, and the famous 'RS' badging in red, to match the one on the grille upfront. Lastly, the hatch runs on two-tone Berlina Black aluminium alloys, too. Page 2 When it comes to entry-level compact hatchback category, the Mazda 2 Hatchback clearly ranks at the top when it comes to visual appeal, banking on a stunning and timeless design. With swooping lines and curves all around, the Mazda 2 Hatchback looks aerodynamically very beautiful. Starting from the front, the Mazda 2 Hatchback welcomes you with its curved front grille, which has got slightly tapered edges while flowing towards the bottom. The curved headlamps are shaped like a bird's eye, which does get chrome finish below them which are basically the extended portions of the edges of the front grille. The headlamps come with LED projectors within them. With an extremely curvaceous profile on the sides, courtesy the two sharp-looking curved lines flowing over the front and rear fenders, the Mazda 2 Hatchback has a sense of flow while moving from front to back. The 16-inch alloy wheels are not machined units like in more premium Mazdas, but their multi-spoke design, along with the door-mounted rearview mirrors, surely matches the sporty persona of the hatchback. The Mazda 2 Hatchback looks quite funky when viewed from the rear, as the hatchback boasts of a rounded and clean profile with slightly curved C-pillar and sweptback triangular tail lamps. When you are looking to get a new car there are a couple of things that you need to consider. These are the facts that will ultimately determine the car you will get. The first thing you need to have in mind is function, reliability, form, price tag, and if you are really picky the brand will come into play. This summary technically tells you what to look for in a car. While a car might check all these boxes you might want to look at the brand. Some car brands have been around for more years than others. This does not mean that they are better, which is why you should consider the carmaker's track record. For example, brands like Honda have made a name for themselves over the years for producing affordable and reliable cars. While the company might have suffered its fair share of blows it is safe to say that Honda has always redeemed itself. Honda has made its way up the success ladder from manufacturing bicycles to building some of the most iconic cars on the market today. And along the way netting a couple of classic rides. Recently, Honda announced that they are rolling out a new addition to their City lineup, the 2022 Honda City Hatchback. Before you dismiss it for being a hatchback, read on. Here is everything we know about the 2022 Honda City Hatchback: the smaller, cheaper Civic, which is not available in the US. Honda City History Via Wikipedia To get a better understanding of the Honda City hatchback we need to go back in time. The Honda City is a subcompact car that has been in production for the past 40 years. The first Honda City car that rolled off the Honda production line was a 3-door hatchback back in 1981. Since then, Honda has made it its priority to build on this foundation. The Honda City is currently in its seventh generation and it does not seem that Honda is ready to call it quits. Like many cars in the market, the Honda City has seen its fair share of issues. These issues resulted in the production of the car being halted at certain points. Nonetheless, this Japanese car has gone on to become a sensation in the East. In other parts of the world, the Honda City is sold under a different name. In South Africa for instance, the Honda City is sold as the Ballade. Now that we can trace the Honda City's history, let's have a look at what is new in the 2022 Honda City hatchback. Via: Honda The Honda City hatchback is currently only sold in Thailand. The new addition to the City lineup is the 2022 Honda City hatchback that was built to take on one of Honda's competitors, Toyota. This hatchback is up against both the Toyota Yaris and the Toyota Vios. This 2022 model is also rumored to be the replacement of the Honda Jazz in Malaysia. With many in the East pitting it up against the Honda City Sedan, the Honda hatchback seems to come out victorious. It is the most ideal car if you are looking for a family car that can be used as a daily driver all through the year without breaking a sweat. Via: Honda The 2022 Honda City hatchback measures 171 inches in length, 68 inches in width, and 58 inches in height. According to these measurements, this hatchback is smaller than most hatchbacks on the market today. This means that the cabin space is really cramped up. Nonetheless, the 2022 Honda City hatchback can fit five adults making it an ideal family car. However, for taller and plus-size adults space can be problematic. Other external features of this ride include 15-inch alloy wheels, LED projector headlamps, rear LED tail lamps, foldable and adjustable side mirrors that come fitted with turn signals, a shark fin antenna, and daytime running lights. Via: Honda For the interior, Honda has fitted the 2022 Honda City hatchback with an 8-inch touchscreen on the dashboard, a power outlet, USB ports, a small storage unit, and ultra-seats that allow for four-seat arrangement styles. These styles include utility mode where the two back seats are folded and long mode where the front passenger seat and the right-back seat are folded. Other modes include the tall mode and the refresh mode. Via: Honda Under the hood of the 2022 Honda City hatchback sis a 1.0-liter DOHC VTEC turbo engine with three cylinders. This engine pushes 122 horsepower at 5,500 RPM and delivers 173 Nm of torque at 2,000 RPM to 4,500RPM to the car's front-wheel-drive drivetrain. Honda paired the 2022 hatchback's engine with a CVT transmission.
