Something went wrong. Wait a moment and try again. Steps:Press the SCROLL LOCK button on the Keyboard.You will see the Scroll Lock is not there anymore on the Status Bar.Move the mouse cursor with the Arrow keys, we will see that scrolling in Excel is no longer the problem. We have finished the first solution to our issue. Method 2 Preventing Arrow Keys from Scrolling Through On-Screen KeyboardSteps:The Status Bar is reflecting that our Arrow keys will scroll in our dataset.Press the Windows Key + R.This will bring up the Run dialog box.Type osk inside the Open box.Press OK.Notice that the On-Screen Keyboard has been opened.Click on the ScrLk button on the On-Screen Keyboard.This will stop the Arrow keys from scrolling in Excel. We pressed the Down Arrow key, our cursor moved from cell B5 to cell B6. Method 3 Stopping Arrow Keys from Scrolling by Applying Excel VBASSteps:From the Developer tab >>> select Visual Basic.This will bring up the Visual Basic window.From Insert >>> select Module.Write our code. Sub Turn\_Off\_Scrolling()Application.SendKeys "{SCROLLLOCK}"End Sub VBA Code BreakdownWe are calling our Sub Procedure Turn\_Off\_Scrolling.We are using the SendKeys method to input a Keyboard button.We have defined Scroll Lock as our button to send.This code works to turn off Scrolling in Excel. Save the code.Put the cursor inside the code and press Run. This will execute our code as described in the VBA code breakdown section. It will stop the Arrow keys from scrolling and if we press the Right Arrow keyour cursor will move from cell B5 to B6. Download Practice Workbook Fix Arrow Keys from Scrolling.xlsm Related Articles
