These boat details are subject to contract.This is my first visit to the Vilamoura Boat Show, with a perfect bright evening , warm music welcoming everybody to this marine festival.My mission was to find the Challenger 1800 . No problems there .This 5 metre jet boat reminds of the Bat Boat , one can almost imagine the caped crusaders zipping into battle, ridding the world of on coming evil.This boat has ample space for a fun day out with a large cockpit fore and aft.A well thought out design with storage lockers hidden under the two futuristic windscreens.Wake boarders and water ski enthusiasts alike will love the funky graphics and bottle green livery.The twin jet engines deliver 110hp each keeping the avid skier on his toes.It also has a specially designed central locker to store the various water toys. Fun in the sun and easy to use, a trailer is available at extra cost.Note: Offers on the asking price may be considered. Ao registrar-se pode ver mais fotos. Esta foi a minha primeira visita ao boat show de vilamoura, numa noite perfeita, musica suave e as boas vindas a todas as pessoas que entravam na marina para ver este festival. A minha misso era encontrar o challenger 1800, sem problema... Este jet boat de cinco mtr. relembra-me o bat-boat e das suas cruzadas contra as foras do mal . Este barco tem um amplo espao para o cockpit largo, um amario para proteger as suas coisas de ficarem molhadas. O motor twin de 110hp da-lhe o poder para pr de p os amigos ou familia com os skis. Gostamos imenso do exterior de cor verde garrafa e especialmente do seus grafittis.Nota: Ofertas sobre o preo original serao consideradas. Where the particulars herein give details of a boat, whether new or used, they are intended to give a fair description of the vessel but are not guaranteed as accurate or complete. They shall not form part of any offer or contract for the sale of the vessel. The prospective purchaser is recommended to independently check the particulars and the vessel. The vendor is not selling in the course of a business unless otherwise stated. Personal property is excluded from the sale of the vessel unless specifically included in the listing specification above or in a purchase contract. Personal property may be equipment or gear not permanently attached to the vessel including but not limited to: artwork, entertainment equipment, fishing equipment, TV receivers, recreational equipment, kayaks, tools, and personal appliances. Photos that may incidentally depict owners' personal property do not convey that such items are included in the sale of the vessel unless such items are specifically listed herein. This boat is easy to operate and has excellent handling. In 1998, this jet boat won the IDEA engineering design award for its 48.7 miles per hour speed at 5,200 revolutions per minute. Its M2 jet drive engine powered by 249 horsepower makes it immensely powerful. Bombardier Recreational Products produced it in two colors for the 1999 model year. BRP was one of the largest recreational watercraft producers when this boat was constructed. The Challenger 1800, made by this Canadian company, is a boat with a seating capacity of 7 people and can be maneuvered on water thanks to its clever design. The Challenger 1800 boats range from jet skis to large jet boats. Even though it is 1,865 pounds and has a beam of 7 feet and 12 feet, this jet boat maintains its stability even as its ripped through rough waters, thanks to the clever engineering involved in its construction. The Sea-Doo Challenger 1800 is powered by a V6 M2 Mercury engine that can reach top speeds of 48.7 mph wide open, but its easy and stable cruising speed is 25 mph. Unfortunately, Bombardier no longer produces the Sea-Doo challenger 1800 or other Sea-Doo sports boats. Although Bombardier stopped producing sports boats in September 2012, it still honors its warranties. Bombardier cites declining sales as the reason for stopping production, which was affected by the financial crisis. As of 2012, Bombardier has been unable to manufacture boats because its sales declined in 2007. Sea-Doos sales have declined across the board due to several factors. Compared to boats with stern drives, they have become less popular. Jet boats are far more expensive to maintain than other boat types. They are significantly noisier, less durable, and more challenging to steer, making their ride less enjoyable. Generally, they need more attention as they tend to suck ropes, seaweeds, and other foreign materials into their pumps, causing problems. also read, 10 Most Affordable Boats for Families Sea-Doo Challenger 1800 has some significant features listed below: A Challenger 1800 is equipped with a standard reverse feature that can be very useful for maneuvering around docks.A weedless intake system eliminates the need to go over the side of the boat every time debris floats in the water and clogs it up.The vehicle has a built-in cooling system that keeps all passengers cool on hot days.It contains A mirror that can be adjusted, allowing you to watch the other water skiers in your area.Stereo System To enhance passenger comfort and enjoyment.For storing water skis, so they are not in the way until they are ready for use, in-sole storage lockers are available. A breakdown of the Sea-Doo Challenger 1800s essential specifications is listed below: Engine: Price: \$19,400Length: 17ft 11in Beam Width: 7ft 6inDraft: 12in Weight (dry): 1,865 poundsMercury M2 Jet Drive.Horsepower: 249 hpCapacity: 7 passengers The following sections will provide information on some of the main features of this boat: Even when the Challenger 1800 is full of passengers, the Mercury V-six M2 Jet Drive can quickly get you up to 30 kilometers per hour (18.6 mph) in two seconds. This boat still delivers great thrills thanks to a 270 lock-to-lock steering system on which you can turn sharply. Apply some throttle and then accelerate after each turn to feel the rush. A rev limiter was installed on this model to avoid damaging the engine. The result is a smooth-running engine that does not make too much noise. Riders report top speeds of 48 mph and 25 to 30 mph cruise speeds. Its capabilities make the jet boat more practical than a personal watercraft (PWC). Some consider it more effective in any water condition than a standard bowrider. In addition to its innovative and modern style, the Challenger 1800 has an ergonomically designed dashboard and a built-in cooler. Additionally, the captains section has a 12-volt plug and a lockable glove compartment. A bolster-style partition separates the two bucket seats in the cockpit from the three seats aft. This boat also has numerous grab rails and appropriately placed armrests. The bow cushions envelop the passengers inside. Despite its size, the Sea-Doo Challenger 1800 still provides a lot of fun for the skipper and passengers. It produces eye-watering acceleration and creates tremendous G-forces during its ride. Though it can travel at speeds exceeding 40 kph, this jet boat will be less intrusive to waterway users annoyed by small PWCs. Unlike small PWCs, this jet boat is large enough so that it wont interfere with its use. In addition to getting you where you need to go and back, a full 151-liter tank should allow you to do everything on your to-do list that day. Once you have a full tank, you can run upstream, play silly buggers, perform slalom tricks for the camera, and tour houses near the shore. A Sea-Doo Challenger 1800 is equipped with an intelligent parking system. The skipper of most jet boats can only steer by operating the throttle, which is dangerous for novices. The Sea-Doo Challenger handles it differently. A jet drive powers the boat, and it pivots while in neutral. While in reverse or forward gear, this boat makes a slow turn while also turning while using the throttle. Seven people can be accommodated onboard. Three seats are available on the aft lounge, two are up front, and two more are behind the consoles at the helm. Freeboard is abundant as well. Moreover, boaters new to the sport will notice that the Sea-Doo Challenger 1800 has a parking system that helps them become more confident on the water. It allows them to maneuver the boat at close quarters and pull up to docks much more quickly than they could with a PWC hand bar. With high-density foam and thick vinyl marine-grade, all seats in the Sea-Doo Challenger 1800 are highly comfortable. In the aft lounge, there is a sun pad. It can be raised to reveal a door leading to the engine. In addition to the non-propelled design, there are two cleats in the bow, twin handle holds, a split navigation light, a center well for anchor storage, and two drink holders. In addition, there are storage compartments under the seat, including anchor storage well. Sea-Doo Challenger The non-slip liners on the Challenger 1800s walkways make it easy for passengers to move around. The consoles are adorned with rakish moldings that are integrated with pop-up windshields. While they appear weak at first glance, these moldings reduce the volume and strength when the wind hits your face. It has a stereo and a video camera port. The captains helm has white gauges that indicate all the captain needs to operate the boat. Instrument panels include gauges for fuel, speed, the boats course, and voltage. Among the features of this boat are an under-fold ski locker and a waterproof switch panel, along with a side mirror that can be used to check if any skiers or passengers are nearby. Its engine is its core. Its multi-chine V-hull is one of the things that made it qualify for the IDEA98 engineering design award. Power comes from a single Mercury M2 jet drive producing 249 hp. As the V-hulls design element, this boat can accelerate quickly, turn quickly, and be nimble in handling. It is also inherently stable, as it provides a stable ride. The Sea-Doo Challenger can quickly pick up speed because of its design and engine power. It can jump out of the water and get into an airplane within two seconds. This boat achieves a top speed of 48.7 mph at 5,200 RPM. Do you know? What is a Cigarette Boat? Why Is It Called That Powered by a single M2 jet drive with a capacity of 249 horsepower, the Sea-Doo Challenger 1800 reaches a top speed of 48.7 mph at 5,200 revolutions per minute. Currently ranked among the most significant, fastest, most potent, and most versatile jet boats available, the Challenger 1800 is fun to operate, easy to navigate, and versatile. The Challenger 1800s that you can buy now are only used since Bombardier Recreational Products stopped producing them in September of 2012. The financial crisis at the time was one of the reasons for that. If you want a new Challenger 1800, you'll have to order from another source. Condition: Used Make: Sea Doo Year: 1997 Location: Kathleen, Georgia, United States Description 1997 Sea doo Challenger 1800 Twin 787 Rotax engines, sound system New twin batteries, Carbs Rebuilt, New Spare tire and mount, New boat cover.
