Are you tired of juggling multiple, disorganized PDF files for a single project? iLovePDF offers comprehensive free solutions to all your PDF needs with its suite of powerful tools that are designed to be user-friendly aids to your daily tasks.This post is here to guide you through the process of merging, removing, splitting, organizing, and adding page numbers to your PDFs like a pro.Whether you're a student looking to combine class notes into a single document, a professional trying to organize business documents, or just someone looking for an easier way to handle PDFs, this is the guide for you!Keep scrolling to improve your document management with these simple step-by-step guides and free tools. Merge multiple PDF files into a single file to sort a group of related documents or simply add some additional pages to the original.Whether you need to merge multiple invoices, receipts, or any other type of PDF document, this tool makes the process quick and hassle-free. Make your documents more manageable with this free PDF merger. How to merge PDF on Mac & Windows:Go to the Merge PDF tool.Upload the first document or page you want to merge from your storage, Google Drive, or Dropbox.Select the red + to add more PDF documents.Select Merge PDF to combine your PDF pages. Select Download merged PDF to save the files to your computer, or upload the PDF to Google Drive and Dropbox. A practical example with the free PDF merger:You are an accountant that has just received a request from a client to submit their tax documents. The client has provided several PDFs, but you need to merge the documents into a single file before they are processed. Merge the PDFs to combine the documents and make them easier to review and process. This streamlining makes it more efficient for both businesses and clients. Need to send or sign official documents with a digital signature? Use the Sign PDF tool to eSign your merged documents yourself or send a request to receive legally binding signatures from others.Need to split a large PDF? Separate PDF pages into independent files to extract the most important pages from a document. Either create multiple files or merge them into a single PDF.The PDF Splitter has two options for removing PDF pages, Split by range and Extract by pages. As a note, with both options you can merge extracted pages into one PDF by selecting the relevant Merge box. Want to split your PDF into a series of files? The Split by range feature divides PDF documents into page ranges, creating files from your chosen sequences.Go to the Split PDF tool. Upload your PDF from your computer, Google Drive, or Dropbox.Choose Split by range.Select Custom ranges to split the PDF between personalized ranges or Add range to add multiple ranges.Select Split PDF.Select Download split PDF to save the files to your computer, or upload the PDF to Google Drive and Dropbox. Are you trying to extract a select few pages from a PDF? Instead of using a range, Extract by pages to create files from the selected pages of your original document.Go to the Split PDF tool. Upload your PDF from your computer, Google Drive, or Dropbox.Choose Extract pages.Select Extract all pages to create a separate PDF file from every page of your document or Select pages to insert page numbers and extract certain pages of your document. Select Download split PDF to save the files to your computer, or upload the PDF to Google Drive and Dropbox. You have received a request to create a print advertisement for a local newspaper. The client has provided a PDF file containing several pages of content, but you only need to use certain pages. Use a free PDF splitter and extract the specific pages you need without having to copy and paste the content into a new document manually.Once the page or pages are extracted, you can create the print advertisement. This saves time and makes the process more efficient than copying what you need. Do you need to send this to a design team to make some edits before publishing? Use the Edit PDF tool to directly annotate PDF pages with text boxes and images or by making notes and sketches with the draw feature. Remove PDF pagesNeed to delete pages from a PDF? Large files with lots of pages can make your job take longer than it needs to, and take up unnecessary space.Remove pages from a PDF document to delete sensitive information, remove content that is no longer relevant, or just to make it smaller.How to remove pages from a PDF on Mac & Windows:Go to the Remove PDF pages tool. Upload your file from your computer, Google Drive, or Dropbox.Select the page thumbnails you want to delete or type the range of page numbers in the toolbar to the right.Once you have your selected pages, click the red Remove pages button.Select Download PDF to save files to your computer, or upload the PDF to Google Drive and Dropbox. Your real estate company has received a request from a client to create a property brochure. The client has provided a PDF file containing several pages of information like pictures and floor plans, but some of the pages are irrelevant and need to be removed.Use the PDF page remover to delete pages from the file. You can easily remove outdated or irrelevant pages and create an up-to-date brochure for the client.The tool provides a shortcut that prevents you from wasting time asking the client to resend the document. Instead, get the job done in a few clicks. Need to send the file to a colleague for review? Upload the final document to the Compress PDF tool to make the file more manageable and easier to send by reducing the file size. Organize PDF pagesUse this tool to rearrange PDF pages for free. Whether you've downloaded a document with misaligned pages, or simply need to reorder your PDF for better organization, this tool makes it easy to edit and customize your document to suit your needs.Sort, add, and delete pages with this tool that acts almost as an all-in-one that does more than just change the order of PDF pages. With the PDF organizer you can edit PDF files to:Organize PDF pages: Drag and drop to change the order of your PDF pages. Add blank pages: Hover over the section you want to edit and click add a blank page.Delete PDF pages: Hover over the section you want to edit and click on the X in the corner. Rotate PDF pages: Hover over the section you want to edit and click on the Rotate arrow.How to organize your PDF pages on Mac & Windows:Go to the Organize PDF tool.Select the files you want to organize from your device, Google Drive, or Dropbox account. Use your mouse to drag and drop pages into your desired order.To insert a blank page, place your mouse between two PDF pages and select the red plus + icon. Place your mouse over individual pages to rotate and delete them. Select Organize.Select the Download button to save the files to your computer, or upload the PDF to Google Drive and Dropbox. You're an editor that's just received a manuscript for a new book in PDF from the author. Some of the pages are not in the correct order and need to be reorganized before the book can be printed.Use the Organize PDF tool to rearrange the pages in the desired order and save the new document when you're satisfied. Once the final version is approved, the manuscript is ready to be sent to the printing press.Do you need to make detailed edits to the text? Use the PDF to Word tool to make an editable Word document from the PDF. Perfect if you need to make lots of changes to the text before sending a final version. Insert page numbers to PDFsAre you trying to add page numbers to a PDF? It can be frustrating trying to find the right page and losing track of what goes where.Add page numbers to a PDF document to reference a specific page, easily add a table of contents, or just make your document look more professional. How to add page numbers to your PDF files on Mac & Windows: Go to the Page Numbers tool.Upload your PDF file from your computer, Google Drive, or Dropbox.Place the page number at the desired location on the document.Select your margin size and customize the text format by selecting the font type, size, color, and style.Select the Add page numbers button.Select the Download button to save files to your computer, or upload the PDF to Google Drive and Dropbox. You've just finished a lengthy research project, but are struggling to format the page numbers. Easily organize your PDF by providing a simple way to reference specific pages with the Add PDF Pages tool. Adding page numbers to PDFs makes it easier for readers to follow along with your content, providing a clear and visible way to track their progress through the document. Using a page numbering tool can give any document a more professional feel, showing you've taken the time to properly organize and structure your content.Need to present your research? Upload your documents to the PDF to PowerPoint converter and create an editable presentation directly from your research project. Need a free app to combine PDF files? The productivity tools of iLovePDF are available on the Mobile App for iOS and Android, so you can organize and edit PDFs on your mobile devices to get things done on the move.Like all of our tools, the app is designed to be user-friendly and quick to use so you can get your tasks done without any fuss.Download the app now to start making the most of the free iLovePDF tools without being tied down to a computer. Any document uploaded to our system is automatically deleted after 2 hours to prevent any unauthorized third-party access. All our servers are secured under European legislation, one of the most restrictive in the world. Easily merge multiple PDF files into a single document with our free online tool. Perfect for combining reports, presentations, or any PDF documents while preserving the original quality. No watermarks, no registration required. Need to combine a PDF and a JPG file? Whether you're building a report, submitting paperwork, or simply want everything in one neat file, you're in the right place.Merging different file types might sound tricky, but it's actually pretty straightforward. In this guide, we'll walk you through the process using iLovePDF--no downloads or complicated steps required.Let's get started.You can merge PDF and JPG files into a single documentConvert your JPG to PDF first, then merge everything together!LovePDF works entirely online--no installation neededCompatible with any device: phone, tablet, or computerGreat for organizing reports, portfolios, or schoolworkWe've all had that moment where we need to pull different files together. Maybe you've got a PDF document and a photo of a receipt, or a visual you want to include in a project. Keeping things separate just makes everything harder to manage.Here are a few situations where merging comes in handy:Adding visual proof to forms: Like screenshots or scans of receiptsSubmitting assignments: Combine written documents with images in one fileCreating professional portfolios: Mix high-quality visuals with written contentBringing everything into one file just makes life simpler--and looks more polished.Since JPG and PDF are two different file types, the first step is converting your image into a PDF. Once everything is in the same format, combining them becomes a breeze.Here's how:Go to iLovePDF's Image to PDF tool.Upload your JPG image.Adjust layout or orientation if needed.Click Convert to PDF Download your new PDF file.Now your image is in the same format as your other files--ready to merge!Once your JPG has been converted, you can merge all your PDFs into a single document.Follow these steps:Open iLovePDF's Merge PDF tool.Upload both your original PDF and the one you just converted.Drag the files into your preferred order.Click Merge PDF.Download your combined file.That's it. No software installs, no confusion. Just one clean, organized file.If your JPG looks blurry or pixelated, consider re-scanning or using a higher-quality image. Clear visuals make a big difference, especially for reports or professional work.Got more than one JPG? You can convert them all to PDFs in one go. This saves time and keeps everything consistent when merging.Rearrange your pages easilyUse the Organize PDF tool on iLovePDF to move pages around after you merge. It's perfect if you change your mind about the order.Merging JPG and PDF files doesn't have to be complicated. Whether you're preparing for school, sending a proposal, or just tidying up your documents, combining everything into one file makes it easier to manage--and easier to share.Tools like iLovePDF simplify the process, so you can focus on what matters instead of fussing with file formats. Merge now iLovePDF takes security very seriously. Remember that... No matter which tool you are using, we use end-to-end encryption to ensure the highest protection against theft or interception of your documents. Any document uploaded to our system is automatically deleted after 2 hours to prevent any unauthorized third-party access. All our servers are secured under European legislation, one of the most restrictive in the world. Getting files from Drive Getting files from Dropbox Uploading file 0 of 0 Time left - seconds - Upload speed - MB/S Merging PDFs... Whoops! Something is wrong with your Internet connection... Upload multiple PDF files and merge them into one. No server, all in your browser. In today's fast-paced digital world, managing multiple PDF files efficiently is essential for professionals, students, and businesses. Whether you're consolidating reports, combining scanned documents, or creating a unified portfolio, a merge PDF tool simplifies the process by combining multiple PDFs into one seamless file. Any document uploaded to our system is automatically deleted after 2 hours to prevent any unauthorized third-party access. All our servers are secured under European legislation, one of the most restrictive in the world. Are you trying to merge PDF files? The Merge PDF tool is popular for its common uses in business, education, e-learning, and beyond. Plus, it's accessible across any device as you can access it on the Desktop and Mobile Apps, Web, and REST API. Long gone are the days of having to print out individual PDF documents onto paper, re-order them and then scan them all together so that they are available as one single PDF. An online PDF Merger allows you to combine multiple PDF files in any order you want for easy viewing and sharing.The Merge PDF tool has countless uses. For example:Imagine you need to share loads of PDF files with another department at work. The last thing you want to do is bombard them with so many different files that they get confused, annoyed and loose track of one or two files in the process. It would be much easier to combine all of the PDF files into one single file for simple sharing. Well that 's what a PDF Merger is for.Let's say you are a university student working on a group assignment with friends. After everyone has individually completed their part of the work, they send their PDFs back to you. In order to submit the final piece of work, you need to find a way of combining all of their PDF files together into one. The solution? The Merge PDF tool.It's great for solo projects too. For example, you could be making your own portfolio for a job application with multiple sections which involved using different file formats such as Excel spreadsheets, Word documents, JPG images and PowerPoint. How can you then put them all into one, presentable PDF file for future employers? Yep, you guessed it. The Merge PDF tool!iLovePDF's online Merge PDF tool lets you combine multiple PDFs in one go for free in your desired order. Here's an easy step-by-step guide. Navigate to our Merge PDF Tool. Select the files you want to merge from your device, Google Drive or Dropbox account. To change the order of your PDFs, use your mouse to drag and drop the files as you want. If you prefer to order the files alphabetically, click on the AZ button to the right. Click the Merge PDF button.Click to download your merged PDF files. You can also save your document to Google Drive or Dropbox.If you need to use our Merge PDF tool frequently to combine numerous files with no limitations, then an ideal alternative to your web browser would be to use our iLovePDF Desktop Version.
